

## **AECM comments on mitigating the economic effects of the corona outbreak**

The economic impact of the coronavirus pandemic on SMEs is pervasive and can best be fought in joint actions of regional, national and European level. As an annexe to this paper, an overview of measures undertaken by AECM's members to counteract the economic consequences is added.

From the European level, it is essential that the support

- is provided quickly on a first come first served basis, meaning that geographical balance is of secondary importance,
- is provided in an easy to comply with way, i.e. standardized to comply with the high number of demands for guarantees,
- is provided in a comprehensive way since all SMEs suffer from the consequences. This is valid content-wise as well as regarding the funding: if no new money is available, reallocation of funding is crucial since the guarantee capacity must be increased in accordance with the increasing demand, and
- is provided in a flexible way since further developments cannot be predicted by anyone at this stage.

From AECM's point of view, the EU level should undertake the following actions to help SMEs through this rapidly evolving situation:

### **State aid:**

A temporary framework is needed like during the financial crisis providing guarantee institutions with enlarged possibilities to support SMEs' access to finance. To this end,

- the *de minimis* threshold should be significantly increased whereas the aid should be considered as transparent irrespective of the applied method of the calculation of the Gross Grant Equivalent (GGE),
- the guarantee coverage for bank loans should be increased up to 90% for loans of up to 7 years so as to support working capital needs of companies and also their rebound on a longer term,
- it should be possible that structural funds could be used as co-financing tools in the temporary state aid framework,
- at least in relation to SMEs, the charging of guarantee fees should no longer be required,
- the duration permitted should take into account also the fact that the default of the SMEs may occur in the year n+2 or n+3,
- the application period should take into consideration the bureaucracy burden often faced by SMEs and therefore, be long enough in order to allow SMEs to make use of the instrument.

## **Financial instruments:**

20 members of AECM are using the COSME loan guarantee facility, 10 are financial intermediaries for the InnovFin SMEG and 17 are using financial instruments under shared management from structural funds. To speed up the procedure, these exceptional times require exceptional measure. Thus, we would welcome the following measures which aim at broadening the scope of existing instruments to allow for higher risk-taking:

- no time-consuming change of the legal base but an interpretation in the widest possible and in a results-driven way; if new calls cannot be avoided, there should be a simplified fast-track procedure put in place; neither any changing of existing contracts should be asked for, nor the requirement to conclude new contracts, no eligibility criteria but fast and result-oriented processing;
- allow for transactions with a duration below 12 months (e.g. 1 month) to meet the demands for short-term guarantees;
- allow for refinancing of existing credit exposures meaning that both, COSME LGF and InnovFin SMEG need to be available to refinance existing short-term working capital loans and overdrafts;
- increase the guarantee rate / percentage of EU counter-guarantees to 80%;
- allow for rescheduling, restructuring and grace periods; more precisely, it should be possible to provide companies with a grace period of 6 months for their loan interest under COSME and InnovFin while extending the termination date of these contracts with the EIF if necessary;
- dropping the innovation criteria and business plan from InnovFin;
- either decrease the reference volume or prolong the deadline or inclusion period so that those members who are confronted with a slow-down of the lending activity in their respective countries will not face the situation that due to non-compliance with the reference volume in the foreseen time to not benefit from COSME at all;
- no more adherence to the 150.000 EUR threshold of COSME or at least a substantial increase of this threshold;
- since SMEs are all affected, the criterion of COSME of high-risk should be applied to all SMEs per se no need for further assessment;
- increase the maximum cap rate of COSME from 10% to at least 20% ideally to 25% and
- expand the regular interest cover from 90 days to at least 180, better 360 days.

We would very much appreciate if the European institutions could take our requests into their kind consideration. To conclude, we would like to underline that AECM and its members stand ready assume their responsibility doing everything possible to overcome the current crisis quickly and as best as possible what will only be feasible in a joint manner.

In addition to the ordinary guarantee scheme and the corona crisis guarantee, the guarantee capacity of Gigarant - for guarantees above one and a half million euros - also doubles to 3 billion euros.</p> <ul style="list-style-type: none"> <li>• <b>CORONA CRISIS GUARANTEE</b></li> </ul> <p>The Flemish government decided to expand the existing 'generic' guarantee scheme, with an already marketed capacity of 300 million euros, with a corona crisis guarantee of 100 million euros. Further extension of the guarantee capacity can be considered if necessary. Under the 'generic guarantee scheme', an existing credit line, credit or a lease for which a guarantee already exists can already be extended.</p> <p>For companies that, due to the impact of the corona virus in particular, have been unable to pay outstanding invoices for longer, the Flemish government is now also making it easier to find financing for their working capital at the bank. The Coronavirus guarantee (EUR 100 million) also allows businesses and self-employed persons to guarantee bridging loans for up to 12 months for existing non-bank debts, while this is only possible for up to 3 months for the existing guarantee scheme. The 12-month period must be counted from the date of signature of the credit contract.</p>

	<p>Moreover, the cost of the guarantee for the entrepreneur is halved: with the crisis guarantee, this goes to 0.25%.</p> <p>Finally, under the EUR 100 million Corona crisis guarantee, bank debts (in addition to supplier debts) of existing credit lines and investment credits that have not yet been placed under guarantee can be guaranteed, insofar as the bank is also prepared to allow a minimum of 3 months payment delay or maintain credit lines. In this way, the crisis guarantee serves as a catalyst for a flexible banking policy towards companies.</p> <p>In addition, the coronavirus guarantee is extended with the possibility of a 50% guarantee on short-term credit lines, provided that they are retained for at least 3 months.</p> <p>More information about the Corona crisis guarantee and how to apply for it <a href="#">can</a> be found here.</p> <ul style="list-style-type: none"> <li>• <b>GUARANTEE CAPACITY OF 3 BILLION EUROS VIA GIGARANT</b></li> </ul> <p>In the context of the temporary relaxation of European state aid rules in the context of the Corona crisis, Gigarant will be able to market an adapted COVID-19 guarantee, which will provide more flexibility</p> <ul style="list-style-type: none"> <li>• <b>SUBORDINATED LOANS</b></li> <li>• <b>SUSPENSION OF REPAYMENT FOR 860 SMES</b></li> <li>• <b>FINANCIAL ASSISTANCE TO COMPANIES</b></li> </ul> <p>You can find more information about the measure <a href="#">on the PMV / z site</a></p> <p>The cost of the guarantee for the entrepreneur is halved: with the crisis guarantee, this goes to 0.25%</p> <p>Additional measures taken by PMW:</p> <ul style="list-style-type: none"> <li>• Increased guarantee capacity with 3,4 billion euro;</li> <li>• Launched additional program for subordinated loans of 250 million euro;</li> <li>• Offers deferred payment on existing loans of 3 months;</li> <li>• Offers financial assistance.</li> </ul> <p>Peter Sleenckx Peter.Sleenckx@pmv.eu</p>

Increase in allocation for the ESIF financial instrument Micro working capital loans for micro and small businesses (EUR 1,000-25,000; grace period of 12 months;</li> </ol>

	<p>reduction of interest to 0,5% - 0,75% - 1,0%, depending on the development index).</p> <ol style="list-style-type: none"> <li>3. Reduction of interest rates on investment loans ESIF Micro and Small loans, with 30% share of working capital, to 0.1% -0.25% -0.5%.</li> <li>4. Increase of the maximum guarantee rate for ESIF individual guarantees for working capital loans from 65% to 80% of the loan principal (guaranteed loans guarantee amount of EUR 150,000-1,000,000) through 17 financial institutions.</li> <li>5. Stronger promotion of HAMAG-BICRO's ESIF Limited Guarantee Portfolio Guarantees up to EUR 150,000 for working capital through 10 financial institutions.</li> <li>6. Establishment of a new financial instrument "COVID-19 Loans / Loans" for working capital for SMEs.</li> <li>7. The establishment of a new financial instrument, the Rural Development Micro Loan for working capital, provides additional liquidity to small business entities in the agricultural, processing and forestry sectors with faster and easier processing, grace periods and lower interest rates.</li> <li>8. A 50% guarantee against the principal of the ESIF Micro working capital loan for the tourism sector, which significantly reduces conventional security instruments and provides a more favorable interest rate of 0.5% - 1.0%, which speeds up the overall processing process.</li> <li>9. <p><b>9. Finnvera Finland</b></p>	<p>Finnvera takes a flexible approach towards all reorganisation needs of financing caused by the coronavirus. We have the capability to significantly increase our SME corporate financing and help enterprises over the crisis. The company must have the potential to operate profitably in the long term. We recommend our customers to proceed as follows:</p> <ol style="list-style-type: none"> <li>1. Contact your bank as early as possible.</li> <li>2. Finnvera and banks are taking a flexible approach towards payment arrangements and such arrangements should be made with the bank as early as possible i.e. Finnvera is ready to prolong both their guarantee and loan repayment days and giving amortisation free period; they are also ready to use 80 % guarantees whenever it's possible; we have broadened the use of SME-guarantee (within COSME) also to such companies which don't necessarily seek growth so that they can use it also in COVID-19 based financing needs; furthermore they are recruiting some extra people to help them with the applications</li> <li>3. Finnvera provides the guarantee to facilitate the working capital granted by the bank.</li> </ol> <p>Finnvera grants the bank the permission to grant an instalment-free period to the loans granted. Companies can apply for a six-month instalment-free period using an electronic application. Companies will only pay the interest and expenses during the instalment-free period.</p> <p>Finnvera's Start Guarantee and SME Guarantee can be used for working capital needs caused by the pandemic. The Start Guarantee is directed at companies which have been operating for a maximum of three years and the SME Guarantee for companies which have been in operation for more than three years.</p> <p>The SME Guarantee can be used to cover a loan of maximum EUR 150,000. Furthermore, the SME Guarantee is still available for the financing of investments and working capital of SMEs seeking growth.</p> <p>When the finance need caused by Corona-virus is over EUR 150 000 – max. 1 MEUR and Start or SME Guarantees are not possible to be granted according to the criteria, Finnvera is able to provide Finnvera Guarantee Fast track, which is also 80% guarantee for lender bank. Fast track is a leaned handling process, where Finnvera is also able to provide the fast guarantee decision and agreements to the lender bank.</p> <p>Finnvera will use the possibilities of the Temporary Framework, eg. 90 percent guarantee rate, with consideration. Finnvera also cooperates actively with all other public and private finance actors in this challenging occasion and follows the market demand.</p> <p>Finnvera reduces and simplifies the pricing of the guarantees used in financing working capital for the corona situation retroactively from the beginning of March 2020. The annual guarantee commission for the Start Guarantee for start-ups, the SME Guarantee for companies that have been active for more than 3 years and Finnvera Guarantee's fast track is reduced to a maximum of 1.75%. The service fee for the Start Guarantee and the SMF Guarantee is reduced and is 0.1% of the amount of guarantee. The change applies to the aforementioned guarantees issued from 1 March 2020 and will be taken into account in the company's invoicing without separate contact from the client. In addition, Finnvera retroactively reimburses the difference in fees to those clients who have already paid a higher guarantee commission or handling fee. For the fast track, the service fee remains unchanged at approximately EUR 400.</p>

<p><b>20. MDB</b> <b>Malta</b></p>	<p>The Malta Development Bank (MDB) has just launched the MDB COVID-19 Guarantee Scheme (CGS). The scheme has just been approved by the Commission under the Temporary Framework (<a href="https://ec.europa.eu/commission/presscorner/detail/en/ip_20_578">https://ec.europa.eu/commission/presscorner/detail/en/ip_20_578</a>). The Maltese Government has allocated a fund of €350 million for the MDB to develop the CGS, with the purpose of guaranteeing loans granted by commercial banks in Malta to meet new working capital requirements of businesses facing cashflow disruptions due to the effects</p>

	<p>of the COVID-19. The CGS will enable the commercial banks to leverage a portfolio of up to €777.8 million in new working capital loans to support all types of businesses in Malta.</p> <p>Eligible working capital costs under the CGS include salaries, rental costs, energy and water bills and fuel, unpaid invoices due to decrease in revenues, acquisition of material and stock for continuation of business, expenses directly related to contracts which were cancelled or postponed because of the present situation, and maintenance costs.</p> <p>Businesses of any size and type can apply for loan amounts that can go up to €5 million, depending on the size, wage bill and turnover of the applicant. Under the CGS, businesses can also benefit from improved access to liquidity, at lower interest rates and with a repayment period of up to six years. In addition, the CGS will provide the much-needed breathing space for businesses by providing a six-month moratorium on both the interest payments as well as on capital repayments. The moratorium period can be extended by the commercial banks to one year on a case by case basis.</p> <p>More information is available on the MDB website: <a href="https://mdb.org.mt/en/Schemes-and-Projects/Pages/MDB-Working-Capital-Guarantee-Scheme.aspx">https://mdb.org.mt/en/Schemes-and-Projects/Pages/MDB-Working-Capital-Guarantee-Scheme.aspx</a></p> <p>The MDB has also recently been appointed by the government to administer and implement an Interest Rate Subsidy Scheme providing a subsidy of 2.5% on all loans covered by the MDB COVID-19 Guarantee scheme. At the moment they are still in the process of consultations with the European Commission for the approval of the scheme as well as discussions with the banks on operational issues of implementing the scheme.</p>

## **2. Businessmax guarantee:**

- The guarantee can cover revolving working capital loan (including a revolving overdraft)- guarantee is treated as a de minimis aid.
- Broader range of eligible costs (resignation from a catalog of eligible costs) and no obligation to submit an investment project plan (in the case of a guarantee constituting de minimis aid).
- BGK is expanding the potential target group - introducing an additional subjective criterion that allows eco-efficient companies to take advantage of the subjective (pro-innovative) assessment path, which will allow them to obtain working capital and investment loans not necessarily related to the environmental effect.
- 5% annual rate for calculating interest rate subsidy will be used until the end of 2021.

## **b) Instruments under preparation**

BGK is planning to offer subsidies for interests on loans.

### **3. Liquidity Guarantee Fund:**

- BGK is working on creation Liquidity Guarantee Fund, from which guarantees will be granted to medium and large companies, affected by the effects of a pandemic,
- Security up to 80% of the loan amount (guarantee amount from PLN 3,5 million to PLN 200 million),
- Only for new or renewed loans,
- Loan amount covered by the guarantee- up to PLN 250 million,
- Guarantee period- max. 27 months,
- Loan purpose- ensuring financial liquidity,
- Guarantees from the Liquidity Guarantee Fund will be granted by the end of 2020,
- Guarantee will be available to companies, that as 1<sup>st</sup> February 2020 didn't have arrears in the Social Insurance Institution (ZUS), Tax Office and Bank.

### **1. Significant changes in Loan for technological innovations**

- Extending the call for proposals in the ongoing competition until 24<sup>th</sup> June (originally 23<sup>rd</sup> April),
- Extension from 30 to 60 days of the deadline for signing a technology loan agreement,

	<ul style="list-style-type: none"> <li>• Extension of the deadline for providing environmental documentation from 10 to 12 months,</li> <li>• Introducing remote panels (so as not to expose entrepreneurs and experts to the need to appear in panels, in person)</li> </ul> <p><b>5. SPMG Portugal</b></p>	<p><a href="https://www.spgm.pt/pt/catalogo/linha-de-apoio-a-economia-covid-19/">https://www.spgm.pt/pt/catalogo/linha-de-apoio-a-economia-covid-19/</a></p> <p>In Portugal, a first credit line of 200 million euros was launched in March as a sub-line of the already existing normal credit line used by the Guarantee Scheme, called “Capitalizar 2018”.</p> <p>In this credit line the loans are partially guaranteed by the Portuguese Mutual Guarantee Societies or MGS (Agrogarante MGS, Garval MGS, Lisgarante MGS and Norgarante MGS) and Counter guaranteed (again partially) through the National Counter guarantee Fund (FCGM), managed by SPMG.</p> <p>This extension was called “Capitalizar – Covid19” and was under the “de minimis” regulation.</p> <p>The very high demand resulted in an immediate increase of the global amount to 400 million euros. It was fully taken in less than 2 weeks.</p> <p>By 20 of March 2020 the Portuguese Government notified the Commission, now already under the Commission State Aid Temporary Framework for the Covid, and launched a 3 billion euros credit line for a few economic sectors. This credit line was further enlarged to 6,2 billion euros, after a second notification by the Portuguese Government during the first week of April.</p> <p>In this credit line the loans are partially (from 80% to 90%) guaranteed by the Portuguese MGS and fully Counter guaranteed by the state through the National Counter guarantee Fund (FCGM), managed by SPMG. So it is a pure public policy measure.</p> <p>This facility is the one currently under work and is generally called “Covid 19”, with some sub-lines. Again there was a huge demand and in the first 5 days after being made available to the banks by mid-April, the demand was around 40 thousand files, around 9 billion euros, thus around 4 times the annual volume of the Portuguese Mutual Guarantee Scheme in terms of loans guaranteed, 6 times the volume of guarantees and 2,5 times the total applications for 1 year.”</p>
<p><b>25. FNGCMM Romania</b></p>	<p>FNGCMM is currently looking at modifying the existing guarantee activity covering the existing credit lines when they have to be renewed.</p> <p>At the national level, the Romanian government has a “business” continuity plan for the situation of non-availability of the institutional staff of 10%, 30% or 50%.</p> <p>FNGCMM encourages banks to postpone the loan payments for a period of 1 to 3 months, in order to support vulnerable beneficiaries during this period. Similarly, FNGCMM shows flexibility regarding the extension of the period of the guarantees granted under the Governmental ‘First House Program’ as well as of credits granted to SMEs from 30 days to 90 days, without charging the guarantee fee.</p> <p>The guarantee ceiling for credit guarantees for SMEs has been increased by 5 billion lei (1.03 million euro). Depending on the financial needs of SMEs, the ceiling can be increased even further and up to 15 billion. The guarantees will be granted for loans for investments and working capital and can cover up to 90% of the loan amount. Interest is 100% subsidized. The guarantee will cover 90% of loan amounts of up to one million lei and 50% for credits of over 1 million lei.</p> <p>The IMM INVEST ROMANIA program is in place as of 17 April 2020 and allows SMEs significantly affected by the COVID-19 crisis to ensure their liquidity for working capital or</p>

For overdrafts and invoice finance facilities, terms will be up to three years.</li> <li>• <b>80% guarantee:</b> The scheme provides the lender with a government-backed, partial guarantee (80%) against the outstanding facility balance, subject to an overall cap per lender.</li> <li>• Under the scheme, personal guarantees of any form will not be taken for facilities below £250,000. For facilities above £250,000, personal guarantees may still be required, at a lender’s discretion, but: recoveries under these are capped at a maximum of 20% of the outstanding balance of the CBILS facility after the proceeds of business assets have been applied; a Principal Private Residence (PPR) cannot be taken as security to support a personal guarantee or as security for a CBILS-backed facility</li> <li>• The borrower remains fully liable for the debt.</li> </ul> <p>Note changes to scheme operational with lenders from 6 April: CBILS has been significantly expanded along with changes to the scheme’s features and eligibility criteria. The changes mean even more smaller businesses across the UK impacted by the coronavirus crisis can access the funding they need. Importantly, access to the scheme has been opened up to those smaller businesses who would have previously met the requirements for a commercial facility but would not have been eligible for CBILS. Insufficient security is no longer a condition to access the scheme. This significantly increases the number of businesses eligible for the scheme.</p> <p><a href="https://www.british-business-bank.co.uk/ourpartners/coronavirus-business-interruption-loan-scheme-cbils/">https://www.british-business-bank.co.uk/ourpartners/coronavirus-business-interruption-loan-scheme-cbils/</a></p> <p><b>Coronavirus Large Business Interruption Loan Scheme (CLBILS)</b></p>

### **Future Fund to support innovative UK businesses**

- Announced Monday 20 April 2020
- Intention of launching for applications in May 2020
- Initial commitment of £250m of new government funding
- Unlocked by private investment on a match funded basis
- For businesses who typically rely on equity investment
- Government scheme developed in partnership with the British Business Bank

On 20 April the Government announced a new Future Fund to support the UK's innovative businesses currently affected by Covid-19. These businesses have been unable to access other government business support programmes, such as CBILS, because they are either pre-revenue or pre-profit and typically rely on equity investment. The scheme will deliver an initial commitment of £250m of new government funding which will be unlocked by private investment on a match funded basis.

The government scheme, which will be developed in partnership with the British Business Bank with the intention of launching for applications in May, will initially be open until the end of September. Over the coming weeks the Bank will work with government on the details on how the Future Fund will operate and how to apply for the scheme.

### **About us**

The 48 members of the **European Association of Guarantee Institutions (AECM)** are operating in 29 countries in Europe. They are either private sector guarantee schemes or public promotional institutions or banks. Their mission is to support SMEs in getting access to finance. They provide guarantees to SMEs that have an economically sound project but do not dispose of sufficient bankable collateral. AECM's members operate with counter-guarantees from regional, national and European level. At the end of 2018 AECM's members had more than EUR 112 billion of guarantee volume in portfolio, thereby granting guarantees to almost EUR 3 million SMEs. AECM's members are by far the most important counterparts of the EIF concerning EU counter-guarantees, handling EU guarantees from the very beginning in 1998.
